

**Art. 6689-3**

Very simple handling by setting of the desired flow-rate on the flow selector. High level of accuracy of measurement irrespective of the cylinder pressure. With integrated safety valve and gauge with indication of the cylinder pressure. The field of application is mainly in TIG, MIG, WIG and MAG welding.

Connection: screw connector for cylinder (to ISO 5145)

Outlet: connector for hose (for hose 6mm) or 1/4" outer thread

Gases: AR, C, N, O, DL

<b>Art. Nr. 6689-3</b>	
Inlet pressure (bar)	300
Working pressure (bar)	4.5 (preset)
Flow rate (l/min)	0.5 – 5 l/min 1 – 15 l/min 4 – 25 l/min
